| Description: Unintended Pregnancies | Value Stream ID: | Site / Location: | Event Number: | Revision: |
| Sponsor: COHC | Process Owner/Team Lead: RMCH Workgroup | Facilitator: Donna Mills | Sensei: | |

| | | | |
|---|---|---|--|
| Current Date: 11/7/17 Event Date: Team Members: | 1: REASONS FOR ACTION <input type="checkbox"/> Go <input type="checkbox"/> No Go <p>Problem: Unintended pregnancies have significant risk for enduring negative health and financial consequences for women, children and their families.</p> <p>Aim: Prevent Unintended Pregnancies</p> <p>Boundaries:</p> | 4: GAP ANALYSIS <input type="checkbox"/> Go <input type="checkbox"/> No Go | 7: COMPLETION PLAN <input type="checkbox"/> Go <input type="checkbox"/> No Go |
| | 2: INITIAL STATE <input type="checkbox"/> Go <input type="checkbox"/> No Go <p>Initial State:</p> <ul style="list-style-type: none"> • Effective contraceptive use among women of childbearing age in Central Oregon is 31.4%. • Crook, Deschutes and Jefferson teen pregnancy rates (15-19 years olds) all dropped from 2015-2016 39.2/1000, 20.6/1000 and 33.1/1000 respectively. Crook and Jefferson are above the state rate of 23.3/1000. | 5: SOLUTION APPROACH <input type="checkbox"/> Go <input type="checkbox"/> No Go <ul style="list-style-type: none"> • If we have community-based interventions for adolescents, then evidence supports that we can expect a reduction in unintended teen pregnancies. • If we have home-based interventions targeting low-income minority populations, then evidence supports that we can expect a reduction in unintended teen pregnancies. • If we have comprehensive risk-reduction interventions for adolescents, then evidence supports that we can expect a reduction in unintended teen pregnancies. • If we have age-appropriate sexual health in schools, then evidence supports that we can expect a reduction in unintended pregnancies. • If we increase contraceptive access, then evidence supports that we can expect a reduction in unintended pregnancies. • If we have programs in coordination with DHS, then evidence supports that we can expect a reduction in unintended pregnancies. • If we conduct outreach, then evidence supports that we can expect a reduction in unintended pregnancies. (please see attached strategies and data) | 8: CONFIRMED STATE <input type="checkbox"/> Go <input type="checkbox"/> No Go |
| | 3: TARGET STATE: <input type="checkbox"/> Go <input type="checkbox"/> No Go <p>Target State:</p> <ul style="list-style-type: none"> • By 2019, increase contraceptive use among women of childbearing age in Central Oregon from 31.4% to 50%. • By 2019, decrease teen pregnancy rates in each of Crook, Deschutes, and Jefferson County by 2%-5%. | 6: RAPID EXPERIMENTS <input type="checkbox"/> Go <input type="checkbox"/> No Go | 9: INSIGHTS <input type="checkbox"/> Go <input type="checkbox"/> No Go |
