Regional Health Improvement Plan (RHIP) Workgroup Frequently Asked Questions

1. Do large organizations with many different departments only count as one vote?

It is important to give equitable value and weight to each partner voice in decision making. To do that, large organizations that completely reside within the same community sector will have one vote. If a large organization resides within multiple sectors, that organization will get one vote per sector.

For example, if there are two people from a large system (for example St. Charles Health System), and one of them is from inpatient hospital care and the other is from primary or family care, they will share one vote because both of those departments reside within the health care sector.

If there are two people from the same umbrella organization (for example Deschutes County), with one of them working in the judicial system and the other is working in public health, they will each have one vote because justice and health care are two separate sectors. Employees of these departments represent significantly different community perspectives.

2. Can I send a representative to vote in my place if I'm not able to attend a decision-making discussion?

There are multiple, on-going discussions and a lot of shared learning leading up to formalizing a decision. Regularly participating gives you a better understanding of these complexities. A representative, or proxy, attending an isolated decision-making discussion will not have the depth of understanding of the topic. Only partners who have maintained their voting partner status will be invited to formalize a decision by voting. See Participation Practices for details.

If you are one of two members representing the same organization and your coworker has attended enough meetings to be a voting partner, they will be able to vote for your organization. However, if your coworker does not qualify as a voting partner, they will not be able to vote in your place.

3. Is a final decision made when 75% agreement is reached by voting partners present in the meeting? Or by all voting partners?

We approach final decisions using the Focused Conversation method to bring partners closer to consensus. When we say consensus, we mean: "Finding and creating areas of shared

understanding; A coming together of the common sense of the total group; An agreement that everyone can live with”.

After coming to consensus, a decision is made when 75% of all voting partner organizations are in agreement.

For example, any partner present for the discussion, will work to reach consensus during the meeting time. The formal decision will be made by all voting partners through an email vote.

This applies to both a positive or negative vote. For instance, if the vote is split 50/50, partners must work to agree by 75% in favor of, or against, an issue.
