October Final Mini-Grant Reports

MINUTES OF A MEETING OF  
THE PROVIDER ENGAGEMENT PANEL OF  
CENTRAL OREGON HEALTH COUNCIL  
HELD VIRTUALLY VIA ZOOM

September 8, 2021

A meeting of the Provider Engagement Panel (the **“PEP”**) of Central Oregon Health Council, an Oregon public benefit corporation (the **“Corporation”**), was held at 7:00 am Pacific Standard Time on September 8, 2021, virtually via Zoom. Notice of the meeting had been sent to all members of the Panel in accordance with the Corporation’s bylaws.

Members Present: Divya Sharma, MD, Chair

Gary Allen, DMD

Emily Harvey, MD

Keith Ingulli, PsyD

Alison Little, MD

Jessica Morgan, MD

Laura Pennavaria, MD

Robert Ross, MD

Members Absent: Carey Allen, MD

Michael Allen, DO

Logan Clausen, MD

Matt Clausen, MD

Sharity Ludwig

Guests Present:

Miguel Herrada, Pacific Source

Donna Mills, Central Oregon Health Council

Gwen Jones, Central Oregon Health Council

Kelsey Seymour, Central Oregon Health Council

Camille Smith, Central Oregon Health Council

Dr. Sharma served as Chair of the meeting and Ms. Smith served as Secretary of the meeting. Dr. Sharma called the meeting to order and announced that a quorum of directors was present and the meeting, having been duly convened in accordance with the Corporation's bylaws, was ready to proceed with business.

#### **WELCOME**

Dr. Sharma welcomed all attendees to the meeting. Introductions were made.

#### **CONSENT AGENDA**

Dr. Sharma asked for a motion to approve the consent agenda.

**Motion to approve:** Dr. Gary Allen motioned to approve the consent agenda; Jessica Morgan seconded. All were in favor, the motion passed unanimously.

#### **VACCINE MANDATES AND BOOSTERS**

Dr. Harvey reported from the Region 7 COVID-19 Situation meeting held on Friday, September 3, regarding vaccine exemption requests. On average providers are reporting about a 30% rate of decliners, which would significantly affect staffing. Most are in accord regarding medical exemptions: they would very rarely be granted, except for serious allergic reactions. She would like more clarity about religious exemptions—everyone says they are accepting them, but no one could comment on how they are vetting them. No one wants to take the risk of having unvaccinated staff infect patients.

Dr. Ross reported that they had been discussing rolling out boosters toward the end of September, pending advice from the CDC, who had just pulled back on the September 20 date. He believed they would move ahead but maybe a week or two delayed and that St. Charles was prepared.

Dr. Morgan discussed plans to launch monoclonal antibody treatment at their east side clinic, noting that the biggest issue was staffing; they would have to do subcutaneous injection because they didn't have an RN. Dr. Ross concurred on the staffing concerns, noting they did not have enough RNs for infusions and pain is an issue with subcutaneous injections. Additionally they were experiencing up to a three-day delay trying to get people into rooms.

### **CULTURALLY AND LINGUISTICALLY APPROPRIATE SERVICES (CLAS)**

Mr. Herrada presented a report on CLAS services and standards to update the group on their progress since last year. He shared that in their last report they had scored 59 of 62 points, the highest-ranking in the state and had connected with 52 Medicaid equity projects in the past year. He also noted that CLAS presentations are included in the PacificSource plan to allocate resources to advance standards system-wide and emphasized communicating to providers, particularly specialists and smaller clinics, that language assistance services exist and are required by Medicaid.

### **QHOC REPORT**

Dr. Little shared the QHOC report, noting that smoking cessation will no longer be required prior to cataract surgery. She also asked that the group consider the ECHO Sponsored Programs Ballot, as Echo needed results in a week.

### **ADJOURNMENT**

There being no further business to come before the PEP, the meeting was adjourned at 7:58 am Pacific Standard Time.

Respectfully submitted,

---

Camille Smith, Secretary

## **Central Oregon Health Council Commitment to Diversity, Equity, Inclusion & Justice**

Every human deserves the basic right to health. Racism is a public health crisis.

As an organization created to improve the well-being of all residents across Central Oregon, the Central Oregon Health Council (COHC) has a responsibility to promote and protect that right to health. We know that health equity will never be achieved unless we address the racism and inequality resulting from biased policies, practices, and ideologies that helped shape Oregon and continue today.

People of color and tribal nations experience pervasive and deep health disparities because of historical and ongoing colonialism and the invalidation of cultural and traditional health practices. By focusing on race, we create a framework to address the impacts of further inequalities experienced by people who are also marginalized by ability, sexual orientation, gender, immigration status and people who live at the intersection of these and other identities. These persisting health inequities threaten the principles and priorities that the COHC was formed to address.

The Central Oregon Health Council is committed to diversity, equity, inclusion and justice in our work culture, grant making, and community partnerships. This is essential to achieving our purpose to build an equitable and integrated health ecosystem that improves the well-being of all Central Oregonians. As a community-led organization, we pledge to collaborate with our partners to address the racial inequities within our communities and organizations.

The COHC commits to:

- engaging and learning with our diverse Central Oregon communities, especially populations who have been excluded, underrepresented, and underserved;
- listening and elevating the voices of communities who are most impacted by our work;
- co-creating with communities throughout our region to achieve more inclusive decision making to meet their diverse needs;
- applying a health equity analysis to build and revise our programs, policies, practices, and grants to be more culturally responsive;
- striving to provide regional leadership and advocacy for health equity through shared governance and accountability with our Coordinated Care Organization, the Regional Health Assessment and the Regional Health Improvement Plan;
- publicizing and referencing this commitment in all appropriate communications;

- evaluating how we follow through on this Commitment to Diversity, Equity, Inclusion, and Justice, and publicly sharing both our successes and failures.

*We recognize we have a lot to learn and much work to do. We ask our partners, members, and staff to support us, join hands with us, and hold us accountable to this commitment.*

### **Call to Action**

The COHC calls on all its members, partners and leaders to develop, adopt, and implement similar commitments to diversity, equity, inclusion and justice. *Together, we must identify meaningful solutions to dismantle structural racism and other forms of oppression. We must ensure every person has the freedom to be healthy, to be safe, and to thrive.*

DRAFT

## **Background (on CODEI page)**

[Health equity](#) means that everyone has a fair and just opportunity to be as healthy as possible. [Social determinants of health](#) contribute to health disparities and inequities. These conditions affect a wide range of health, functioning, and quality-of-life outcomes and risks. Racism, discrimination, violence, and wealth inequities are examples.

[Structural racism](#) is a social determinant that has been fundamentally woven tightly into the fabric of American society. Structural racism has established and reinforces a legacy of racial oppression and differential distribution of goods, services, opportunities, and protections by race. These include safe and affordable housing, quality education, adequate income and wealth building capacity, accessible quality health care, access to healthy food, safe and healthy neighborhoods, social connectedness and belonging.

Since 2020, the [Centers for Disease Control](#), [American Medical Association](#), and [American Public Health Association](#) have declared racism a serious public health emergency and threat. More agencies and states continue to join this [declaration](#).

The [Oregon Health Authority](#) and the Governor have prioritized health equity. The [State of Oregon Diversity, Equity and Inclusion Action Plan](#) aims to guide the still early efforts of the state enterprise to dismantle racism and establish a shared understanding. The purpose of [Healthier Together Oregon: 2020-2024 State Health Improvement Plan](#) is to advance health equity. Coordinated Care Organizations and Public Health Departments are implementing comprehensive health equity plans consistent with [National CLAS Standards](#). Health equity is not just a strategic priority, but essential to the organizational mission and values of the Central Oregon Health Council.

Health equity is a cornerstone of the [2020-2024 Central Oregon Regional Health Improvement Plan \(RHIP\)](#). Central Oregon strives toward an equitable health system where all people can reach their full health potential and well-being. Achieving health equity requires ongoing collaboration of all Central Oregon communities to address the inequitable distribution of resources, wealth and power; and to recognize, reconcile and rectify historical and contemporary injustices (2020-2024 RHIP).

## **Our Journey To Date Towards Health Equity**

The COHC was founded in 2009 by medical and government leaders within our Central Oregon communities with the vision of improving health for every individual living in our region. Since then, the COHC has grown and the regional understanding of health, social determinants of health and health equity has evolved and developed. Out of our desire to better engage our communities, our partnerships have expanded outside the medical community to non-profit social services and education. Partnership remains an integral part of who the COHC is.

The Central Oregon Diversity, Equity, and Inclusion (CODEI) Committee was formed in 2019 to provide actionable strategies to advance [diversity, equity and inclusion](#) in support of the goals of

the Central Oregon Health Council (COHC) as articulated in the Regional Health Improvement Plan (RHIP). Since the inception of CODEI, the COHC has accomplished the following:

- Creation and implementation of CODEI Action Plan, and development of resources to support progress in advancing health equity
- Supported the COHC Board of Directors prioritization of health equity in the current strategic plan
- Highlighting opportunities to advance health equity in RHIP workgroups
- Inclusion of health equity priority in community grant programs
- Beginning to identify and share data to support health equity

## RHIP and COVID-19 MINI-GRANT PROJECT SUMMARIES

### **COVID-19 Final Report for Jefferson County Public Health (Non-RHIP)** **“COVID-19 Vaccine Administration and Distribution Grant”**

#### **Summary of Results:**

- Funding was utilized to support COVID-19 vaccine Points of Dispensing (PODs) in communities throughout Jefferson County.
- Specifically, the funding was utilized to purchase an additional vaccine transport cooler and the additional supplies needed for the clinic (band-aids, cotton balls, disinfectant supplies, etc.).
- PODs were hosted at several locations throughout Madras, Crooked River Ranch, Culver, and Camp Sherman.
- All requested supplies were received.
- Beginning in January 2021, Jefferson County Public Health started providing vaccine outside of the clinic setting.
- These PODs (Points of Dispensing) were set up throughout the community at schools, churches, businesses, community centers, skilled nursing facilities, parks, and fire stations.
- The PODs varied in size from 1,500 attendees down to 10 attendees.
- The PODs and equipment purchased with the COHC grant continue today.
- Additionally, the vaccine transport cooler is now being utilized to provide in-home vaccinations for highly vulnerable individuals and/or caregivers that are unable to leave their homes.
- Supply chains, especially for vaccine related equipment and supplies, were on serious back order. It took an additional 3 months to receive our vaccine cooler.

#### **Quote:**

“We have seen numerous people cry tears of joy for receiving the vaccine and take families ‘selfies’ after the event.”

Dr. Michael Baker, Jefferson County Public Health

### **COVID-19 Final Report for Deschutes County Health Services (RHIP)** **“Grandpad Pilot Program”**

\*Order of projects is by final report submission date

Published October 2021

## RHIP and COVID-19 MINI-GRANT PROJECT SUMMARIES

**Reviewed by the Promote Enhanced Physical Health Workgroup**

### Summary of Results:

- The COHC grant funded the purchase of 7 Grandpad devices.
- Many older adults in our community are not able to access their providers due to isolation, being quarantined, lack of appropriate technology including internet access or physical challenges such as blindness or deafness.
- These barriers make it impossible or extremely challenging to provide them with quality mental health and medical care.
- The Grandpad devices have given our team direct access into client homes or facilities through face to face technology in order to provide vital mental health services to vulnerable older adults during this continuing pandemic.
- The primary result from purchasing the Grandpad devices is to continue to provide vital mental health services during this pandemic that otherwise would not have been available.
- Since starting the Grandpad program we have increased our telehealth capability with older adults from zero to 1100%. Some benefits we have observed are the following:
  - Grandpad's have offered a social lifeline to isolated older adults, allowing them to connect with family and friends.
  - Clients report an increase in self-esteem as they have mastered learning new technology that is often overwhelming or intimidating.
  - Clients report enjoying features of the Grandpad such as the articles, internet access, radio and games. These additional features have allowed clients to enjoy entertainment and provided continued connection to the "outside world".

### Quote:

One client reports the following: "I was nervous about using the Grandpad. Technology is usually hard to learn and confusing. I wasn't sure if I could do it. I am happy to say I was able to learn something new and with the help of the Older Adults team I am able to stay connected. I use it to do therapy and I can also talk to my family and friends. When we are on "lock down" it can be depressing, but it helps to know I can reach out to my Older Adults team, family or friends. It's nice to use the features like the radio, articles and I love playing the games. I am grateful for this tool, especially during the pandemic when we have lost so many connections and outlets".

**RHIP Mini-Grant Final Report for Central Oregon Locavore**

**"Central Oregon Locavore Program Support"**

**Reviewed by the Address Poverty & Promote Physical Health Workgroups**

### Summary of Results:

- Central Oregon Locavore set out to promote the well-being and belonging of our community members through our WWOLF (Willing Workers on Local Farms) and Edible Adventure Crew programs along with increasing intake of local fruits and vegetables through SNAP usage and sharing recipes.
- We were able to exceed our goal of hosting 4-10 WWOLF and Edible Adventure Crew events.
- Between August 2020 and August 2021, we hosted 11 WWOLF events and 6 Edible Adventure Crews for a total of 17.
- We also developed a partnership with the Oregon Youth Challenge Program to bring at-risk high school youth to farms for a day of volunteering.
- These events included medicinal plant and edible weed walks, blueberry harvesting, apple picking and pressing, and potato gleaning that resulted in hundreds of pounds of potatoes being donated to NeighborImpact.
- We were able to hire a staff person to manage both programs and provide mileage reimbursement for travel to the various sites.
- Additionally, Our SNAP sales increased from an average of \$2,500 a month before August 2020 to \$4,500 during the grant period.

### Quote:

“Having the WWOLF crew out to help with some big projects on the farm really cut down on the time it would normally take to complete those tasks by a ton! Having 14-16 sets of hands instead of 2 really does make for lighter work that is so much more enjoyable. The group was extremely motivated, and many had already volunteered several times together. It really had a community feel. I got to know some familiar faces and met so many new folks from our community.” - farmer Gia
